

**OUR FRIEND
DAISY THE DOG**

Meet Daisy!

Hi, my name is Daisy, I belong to Mrs Andrews, and I love coming to school. I am a Jack Russell breed, and I was born on 8th May 2019.

All about me

Who is your human? My human is Mrs Andrews who works in the office. I don't like being on my own and so I usually follow my human around and if she sits down, I like to sit on her lap for cuddles.

What do you like? I love playing with little balls and I ask humans to throw them for me. When I'm really excited, I run around and play with my toys in my mouth. I love going for a lunchtime walk with my human too. When I'm tired, I love going to sleep in my bed!

How would Mrs Thorn describe you? She thinks I'm very cute and loves dogs herself. She says I'm great at catching my ball and secretly shares her lunch with me when she has time!

How do the humans keep you safe in school?

-  I have my special human, Mrs Andrews, in school and don't go very far from her.
-  My human keeps the office clean and tidy so I don't eat anything I shouldn't, and I have my own special bowls
-  I don't really like the alarms, so when it goes off my human pops my lead on and carries me safely outside.

Health & Safety

Daisy has been coming to St Georges every day, all of her life. She is very settled and happy at school.

-  Daisy has a health check at the vets every 6 months. She is kept up to date with worming and flea treatments and her annual vaccinations.
-  She is microchipped and wears an ID tag on her harness.
-  Daisy has grown up surrounded by children – she is very well socialised and calm.
-  When she is at school, Daisy is allowed to roam free, however Daisy is very obedient and 2 strong claps with the instruction 'bed' will send her back to the office.
-  Her interactions with children are supervised by an adult at all times.

Please can you let us know as soon as possible if your child is anxious around dogs or has an allergy to dogs, or any other pets, so we can ensure we take that into account.
